## PROFESSIONAL SUMMARY

3rd-year B.Tech Computer Science & Engineering student skilled in Java, SQL, DBMS and Data Structures & Algorithms. Completed a Data Analyst internship at Bluestock Fintech and built two projects, Expense Tracker and CareerX. Seeking software development and data analyst internship opportunities.

## EDUCATION

|                                                                                                     |                       |
|-----------------------------------------------------------------------------------------------------|-----------------------|
| <b>MLR Institute of Technology, Hyderabad</b>                                                       | 2024 – 2028 (Ongoing) |
| B.Tech in Computer Science & Engineering   3rd Year                                                 |                       |
| <b>Government Polytechnic College, Gadwal</b> — Diploma in Computer Science & Engineering (3 Years) | 2022 – 2025           |
| <b>Zilla Parishad High School</b> — SSC, Telangana Board                                            | 2020 – 2022           |
| <b>Shiva Shivani High School</b>                                                                    | 2013 – 2020           |

## TECHNICAL SKILLS

**Languages:** Java, SQL, HTML, CSS

**Tools & Platforms:** Git, GitHub, VS Code

**Core Concepts:** Data Structures & Algorithms, DBMS, Database Management, Web Basics

## EXPERIENCE

|                                                                                                                                                                                                                                          |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Data Analyst Intern</b> — Bluestock Fintech                                                                                                                                                                                           | Jun 2026 – Aug 2026 |
| <ul style="list-style-type: none"><li>Completed a Data Analyst internship at Bluestock Fintech from 20 June to 20 August 2026.</li><li>Gained practical exposure to data analysis tasks in a professional fintech environment.</li></ul> |                     |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                           |

## CODING PROFILES & ACHIEVEMENTS

[LeetCode](#) | [HackerRank](#) | [CodeChef](#)

- HackerRank: 4★ SQL and 3★ Java; SQL Basic & Intermediate Verified Certifications.
- Earned the LeetCode 50 Days Badge through consistent DSA practice.
- Consistent DSA practice across LeetCode, CodeChef and HackerRank.

## KEY ACHIEVEMENTS

- Completed the Tata GenAI Powered Data Analytics Job Simulation through Forage, covering exploratory data analysis, risk profiling, AI-based delinquency prediction and data storytelling.
- Completed six-month industrial training at Pixel Quest (database management, SQL, core programming).
- Earned 7 certifications across Java, SQL, DBMS and Data Structures.
